

The South Florida Palm Society (SFPS)

THE PALM REPORT

Spring Palm Show & Sale 2025

Welcome to the South Florida Palm Society Spring Palm Show and Sale at the University of Miami. We have something for everybody! The growers offer uncommon or rare palms and cycads for sale. They can help you to select the ideal plants for your yard and give you advice on how to maintain them. Having UM's Arboretum next door shows you how perfectly palms can blend into the tropical landscape.

It just takes one special plant, for you to become a grower too. This is exactly how I became interested in palms and cycads. The various growers assembled here have a real passion for their plants.

I hope in time you will become equally passionate about palms, cycads and other tropical plants. It is the mission of the South Florida Palm Society to increase the public awareness of palms in landscapes, public spaces and their natural habitats. From this awareness comes interest in saving these valuable tropical plants from destruction in their native habitats.

Thus, the sale is a perfect fit for the mission of the SFPS. Twice a year, we have members-only garden tours, to view truly beautiful landscapes. At our meetings, we have presentations on palms in their native habitats, such as Brazil, Peru or Mauritius. Many other topics are discussed as well, including talks on how to maintain your palms.

So, please enjoy the day. If you can, take a stroll through the Gifford Arboretum. And consider joining our Society and helping us achieve our mission.

Sincerely,

David Lord

President, South Florida Palm Society

The South Florida Palm Society (SFPS) is a not-for-profit organization whose mission is to disseminate information about and encourage interest in palms. The South Florida Palm Society uses its funds to help support local botanical gardens, individual scientific research expeditions or projects, conservation, planting projects and educational efforts. The horticultural society was reincorporated in 1982, but dates back to 1955.

Join our society to support these projects.
